The Rehoboth PROJECT

Because God Has Made Room for Us.

Faith & Safety Infrastructure Lab

PEOPLE · PLACES · POSSIBILITY

Stronger Communities.
Safer Cities.
A More Just Tomorrow.

Turning Faith Assets into Lasting Community Safety.

The Faith & Safety Infrastructure Lab is a practical, collaborative learning experience for congregations, coalitions and community partners who want to activate the unique assets of faith communities in alignment with broader civic systems to build durable safety.

> *When faith communities organize their assets, align with their partners, and build for the long term, they don't just respond to crisis — they help create communities where people can thrive.*
>
> *— The Rehoboth Project*

IN THE LAB, WE WILL:

SEE
Map what we have
Identify and assess the people, relationships, programs, property and influence already present in the faith ecosystem.

ORGANIZE
Align for greater impact
Build trust, strengthen relationships and determine how assets can be aligned across congregations and with community partners.

BUILD
Develop and implement
Create shared strategies, governance structures and infrastructure for long-term impact.

SUSTAIN
Make it last
Institutionalize what works so communities remain strong — beyond any single program, leader or funding cycle.

WHO SHOULD ATTEND?

- Faith Leaders
- Congregations & Faith Networks
- Civic Leaders
- Schools & Universities
- Hospitals & Health Systems
- Justice Institutions
- Philanthropy, Business & Community Leaders

Join Us!

Be part of a national conversation to build the infrastructure for stronger, safer and more just communities.
